

Enterprises that value **privacy and security**
choose Syndica

Brave Browser chose Syndica to power their RPC
infrastructure - here's why.

The Brave Browser is a fast, private, and secure web browser for PC, Mac, and mobile that blocks many advertisements and website trackers by default.

Users can turn on optional ads that reward them for their attention in the form of Basic Attention Tokens (BAT), which can be used as digital assets to make payments to registered websites and content creators. Users can store their tokens on their Brave Wallet, which connects to multiple blockchain networks.

Over the last few years, Brave Browser grew exponentially - it needed a new infrastructure provider that optimized for privacy and security.

They asked around the ecosystem, and were recommended Syndica.

“ We had heard great things from other partner projects that were using the Syndica infrastructure.”

James Mudgett

VP of Web3

Brave uses Syndica to power its in-browser SOLANA wallet.

Brave Wallet is a self-custody crypto wallet built directly into the Brave browser, enabling a faster, safer, and more user-centric Web3 experience.

With Brave Wallet, users can:

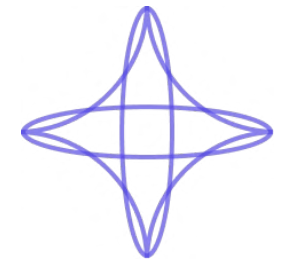

- Buy, sell, and store both Solana (SOL) and fungible Solana tokens (SPL) in Brave Wallet
- Swap Solana tokens with the built-in DEX aggregator
- View and manage Solana NFT collections with the built-in NFT gallery

All of these on-chain activities use Syndica infrastructure to read and write data on the Solana blockchain using RPC calls and WebSocket connections. The Brave Wallet experiences a >99.99% success rate on as many as 500 calls per second it makes to the Syndica endpoint.

**Privacy and
security are
paramount to
Brave.**

**Syndica was the
solution.**

**“ Syndica was able to deliver
quickly on Two-Factor
Authentication and work
with us on optimizing for
our privacy requirements. ”**

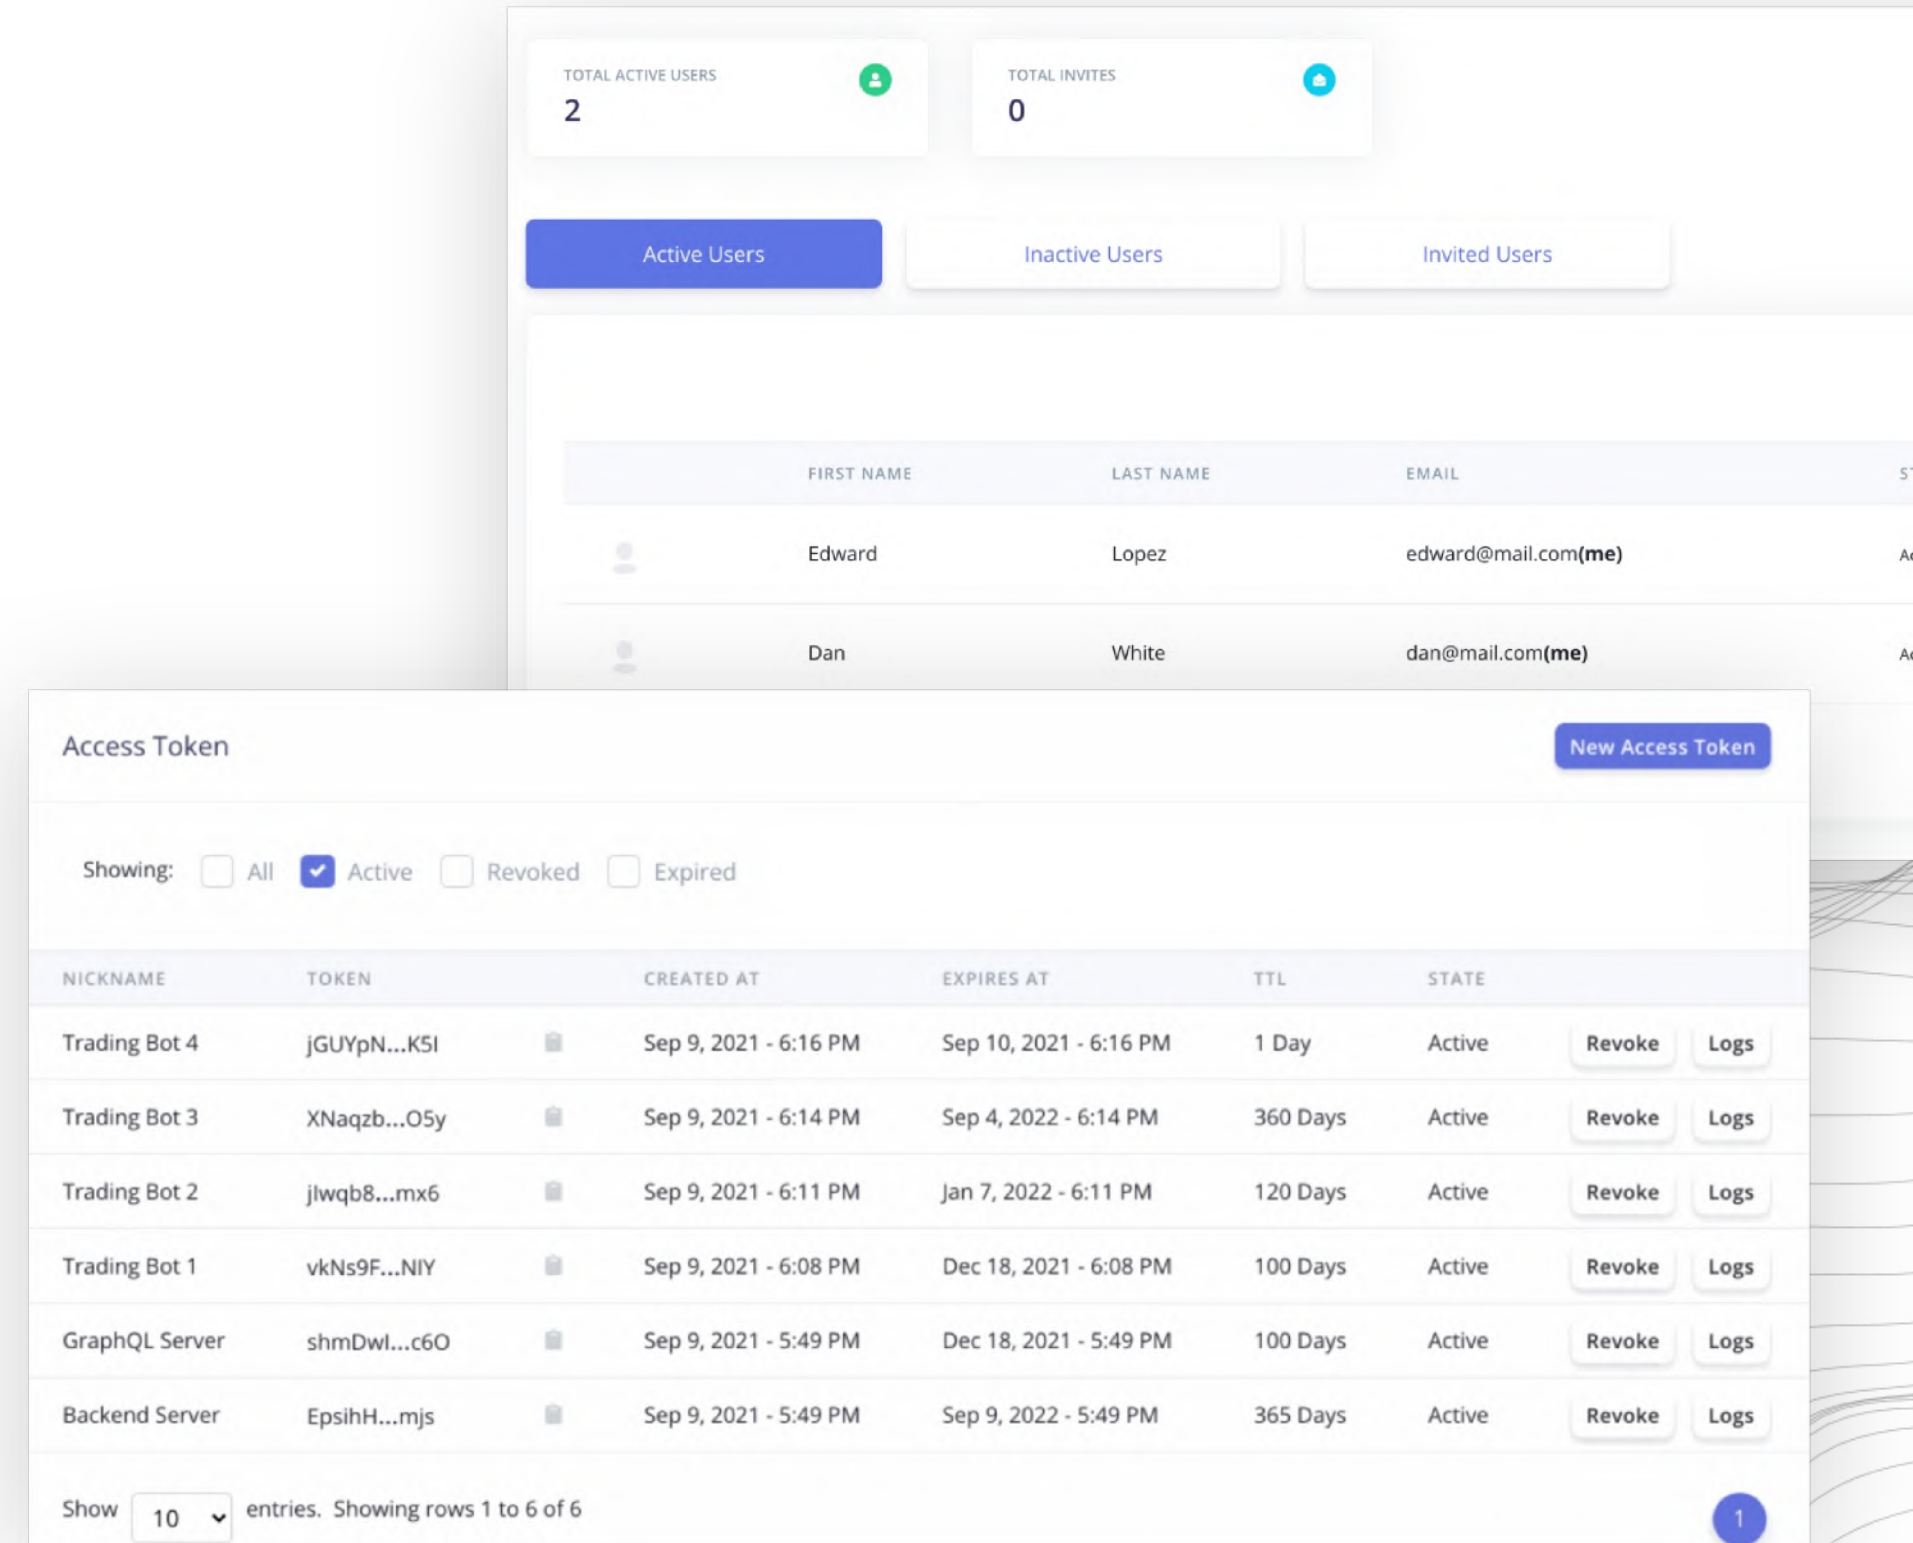

James Mudgett

VP of Web3

Syndica offers best-in-class privacy and security.

- User Management (RBAC i.e. Role-Based Access Control)
- Key-Token exchange to protect you from token theft
- Multi-Factor Authentication: User's ability to use MFA to login to the Syndica platform
- Stack-Specific Access Tokens: Manage permissions and segment data by generating access tokens for each stack. Precisely control access by specifying the life of each token
- Signed verifiable responses to ensure data authenticity

The screenshot displays the Syndica user management interface. At the top, there are two summary cards: 'TOTAL ACTIVE USERS' with a value of 2 and a green user icon, and 'TOTAL INVITES' with a value of 0 and a blue invite icon. Below these are three buttons: 'Active Users' (highlighted in blue), 'Inactive Users', and 'Invited Users'. The main section shows a table of active users with columns for First Name, Last Name, and Email. Two users are listed: Edward Lopez (edward@mail.com(me)) and Dan White (dan@mail.com(me)).

Below the user table is a modal window titled 'Access Token' with a 'New Access Token' button. It features a filter section with 'Showing:' and radio buttons for 'All', 'Active' (selected), 'Revoked', and 'Expired'. The table below lists access tokens with columns: NICKNAME, TOKEN, CREATED AT, EXPIRES AT, TTL, and STATE. Each row includes 'Revoke' and 'Logs' buttons.

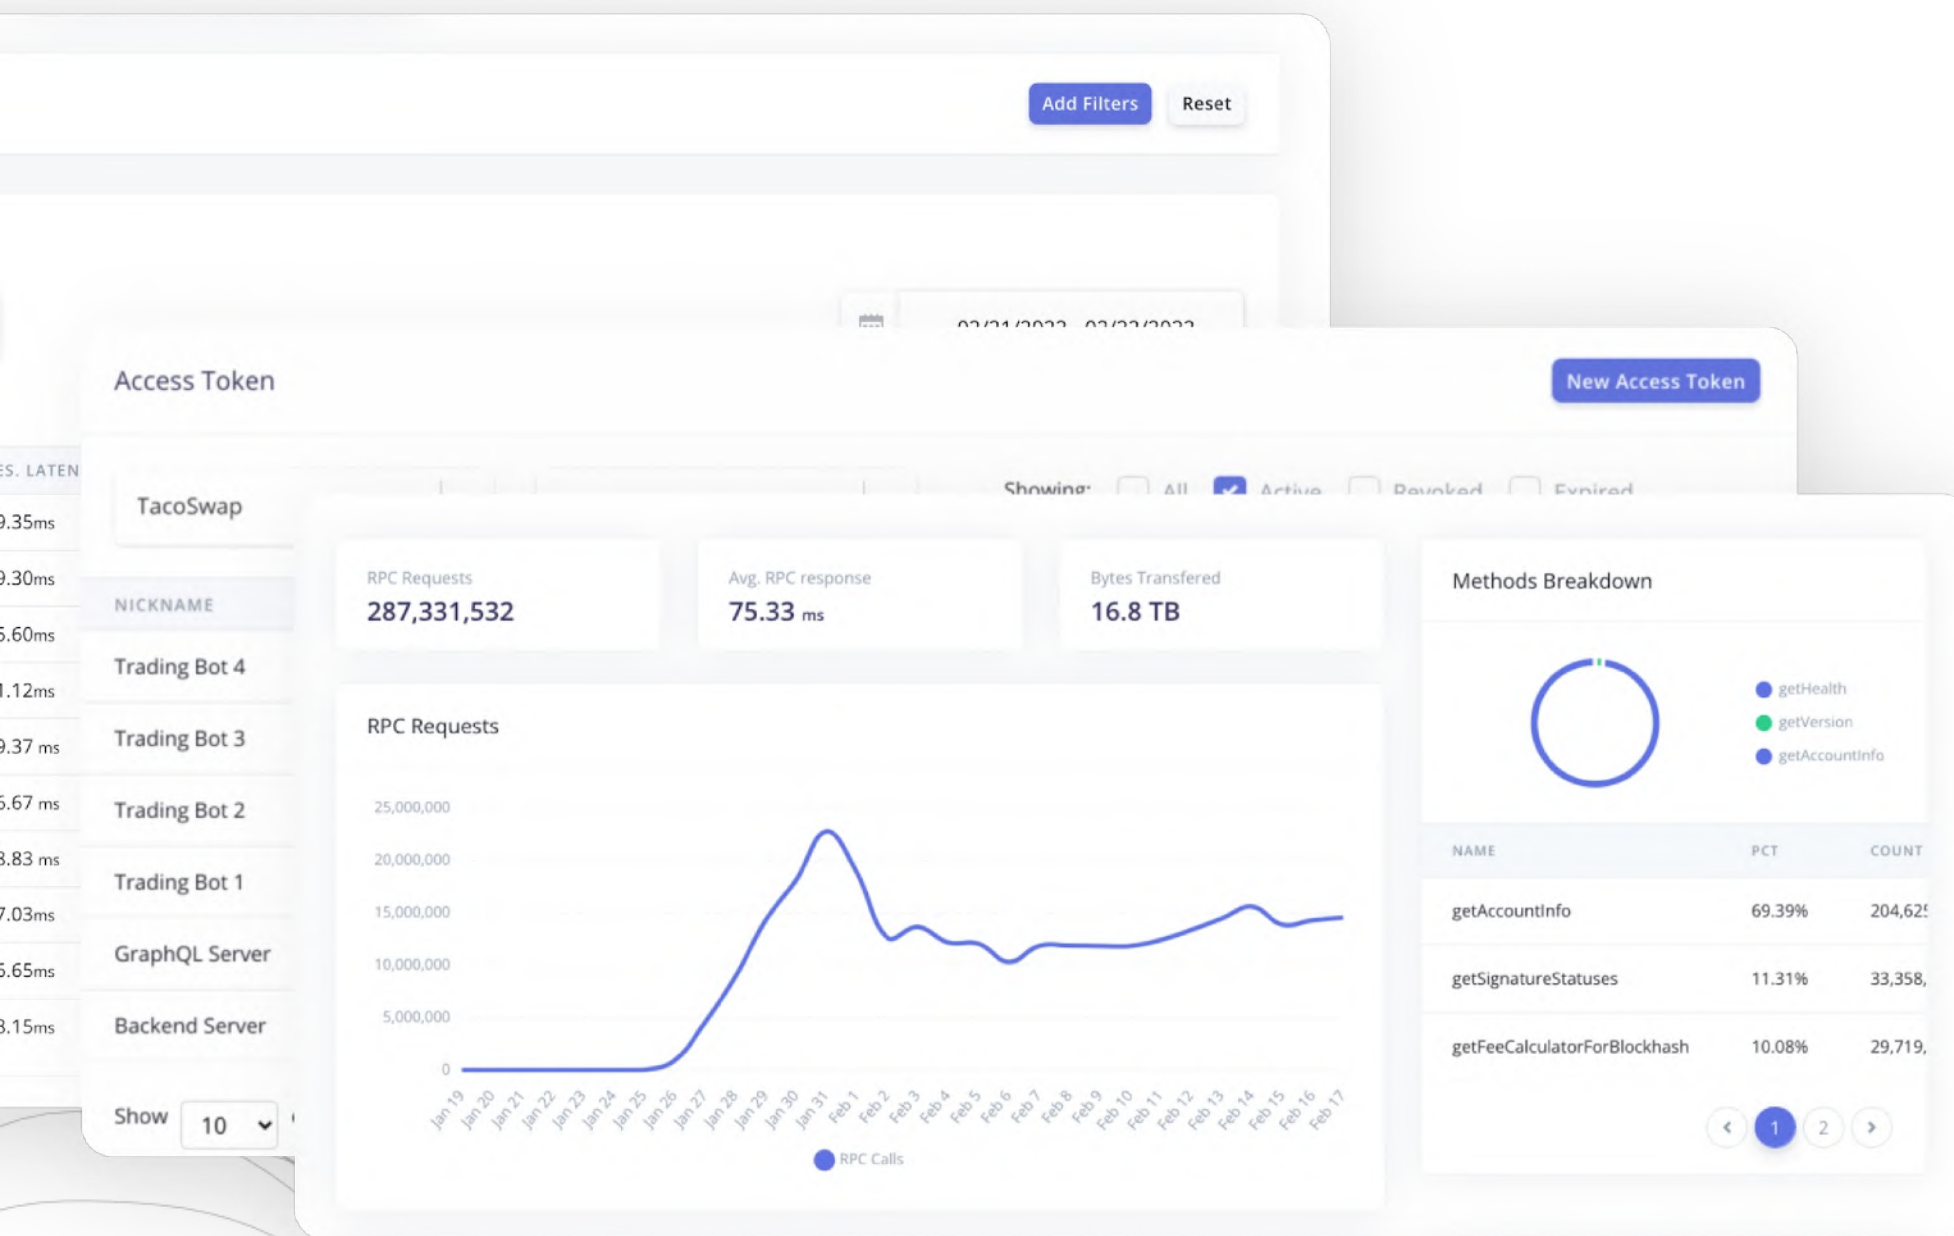

NICKNAME	TOKEN	CREATED AT	EXPIRES AT	TTL	STATE
Trading Bot 4	jGUYpN...K5I	Sep 9, 2021 - 6:16 PM	Sep 10, 2021 - 6:16 PM	1 Day	Active
Trading Bot 3	XNaqzb...O5y	Sep 9, 2021 - 6:14 PM	Sep 4, 2022 - 6:14 PM	360 Days	Active
Trading Bot 2	jlwqb8...mx6	Sep 9, 2021 - 6:11 PM	Jan 7, 2022 - 6:11 PM	120 Days	Active
Trading Bot 1	vkNs9F...NIY	Sep 9, 2021 - 6:08 PM	Dec 18, 2021 - 6:08 PM	100 Days	Active
GraphQL Server	shmDwl...c6O	Sep 9, 2021 - 5:49 PM	Dec 18, 2021 - 5:49 PM	100 Days	Active
Backend Server	EpsihH...mjs	Sep 9, 2021 - 5:49 PM	Sep 9, 2022 - 5:49 PM	365 Days	Active

At the bottom of the modal, it says 'Show 10 entries. Showing rows 1 to 6 of 6' and a page number '1' in a blue circle.

Syndica has the most feature-rich product suite.

- Custom Log Retention: customize log retention periods based on privacy preferences and data policies
- Active Account Monitoring (we let you know if there's any easily identifiable issues with your RPC or WS calls)
- Advanced Filtering and Search to trace RPC calls and perform cohort analysis
- Detailed and Structured Logs provide ultimate visibility. Easily debug your program and understand RPC request-level data
- Specialized APIs such as ChainStream
- Elastically scalable RPC infrastructure

Syndica provided a smooth transition process.

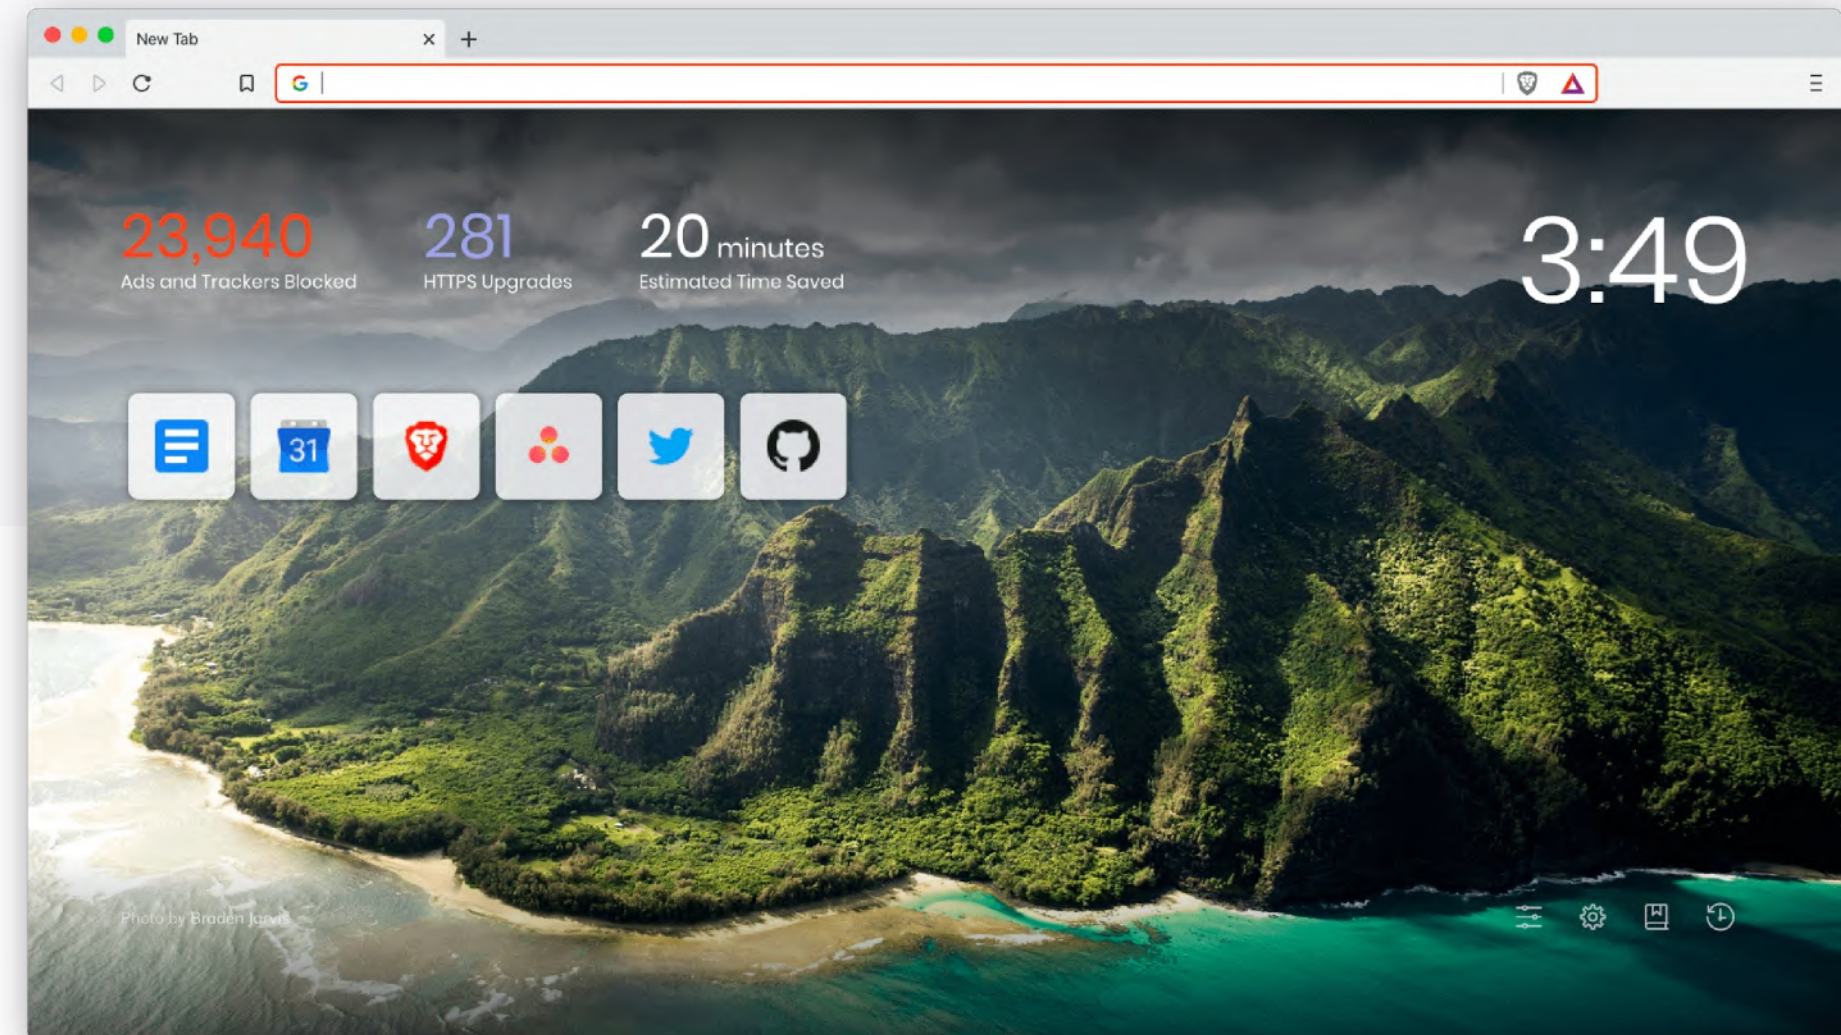

“The Syndica team listened to our needs.”

Since switching to Syndica,

“Things are calm and that's good.”

James Mudgett

VP of Web3

Switching to Syndica gave the Brave team **peace of mind.**

► **99.99%**
Syndica Uptime

► **1000s**
of RPC calls per second

► **100s**
of TBs of data transfer

Elastic Nodes

The 'AWS' equivalent for web3: Enterprises can scale on autopilot. Elastic nodes intelligently route requests so that infrastructure is autonomously managed.

Developer APIs

Developer APIs like our Chainstream API allow users to get the fastest real-time updates of on-chain activity by subscribing to Block, Transaction, and Slot Updates.

Logs and Analytics

Sift through RPC request data at-a-glance and get to know your audience using detailed views of customer-level logs and analytics.

**We've seen a 95% drop
in incident reports
since switching to Syndica.**

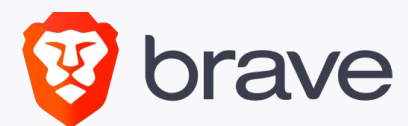

James Mudgett

VP of Web3

brave

The world's top enterprises demand the best in infrastructure.

When it comes to the privacy and security of their application, engineers at Brave are able to rest easy knowing Syndica has their back.

Syndica provides best-in-class RPC node infrastructure so that you can build your enterprise, leaving the rest to us. Our service is specifically designed for high-volume enterprises and offers the customizability and dedicated support for seamless integration with Solana.

Syndica is the privacy and security-focused enterprise solution
